

YCANTH[®] Patient Treatment Guide

What to Expect Post Treatment:

After treatment:

If you experience discomfort, use an over-the-counter pain medication.

Blisters form within 24 to 72 hours.

The next few days:

Avoid squeezing, “popping,” or scratching any blisters, as they could become infected.

Seven to 14 days after treatment:

If scabs form at the treatment sites, try to avoid picking or scratching—removing the scab can increase the risk of scarring.

Follow-up Appointments

Please note: Most patients require more than one treatment to completely clear their bumps. You or your child remain contagious until all bumps are clear.

What To Do After Treatment

Wash all treatment sites 24 hours after treatment with a gentle soap and water. Avoid washcloths or abrasive surfaces. You may wash YCANTH off of your skin sooner if directed by your healthcare provider, or if severe application site reactions occur.

Avoid creams, lotions, oils, and sunscreen on the treated skin. These products should not be applied for 24 hours or until after washing the affected and treated skin.

If discomfort occurs, over-the-counter medicine such as acetaminophen or ibuprofen can be taken as needed. Monitor the treated areas for excessive blistering, redness, pain, or itching.

Blistering is a sign that YCANTH is working to help clear the bumps from your skin.

Getting rid of the bumps...

Molluscum is highly contagious, making it crucial to collaborate with your doctor to fully eliminate it. It may require three or more visits to ensure that any new bumps are treated effectively. After the initial treatment, the bumps can easily continue to spread to others. To ensure complete recovery, it's wise to schedule follow-up appointments before leaving your doctor's office.

To report SUSPECTED ADVERSE REACTIONS, contact Verrica Pharmaceuticals Inc. at 1-877-837-7422 or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

\$25

PER TREATMENT VISIT*

Copay savings for commercially insured patients*

The YCANTH Copay Assistance Program can help you save on the cost of your medication. Patients with commercial insurance can pay just \$25 per YCANTH treatment visit.* Eligibility requirements apply.

YCANTH Patient Guide

Ycanth
(cantharidin) TOPICAL SOLUTION 0.7%

*Program is solely for patient's charges incurred in the use of YCANTH (cantharidin) topical solution and does not include any other related charges. The Program is only for qualified commercially insured patients who have been prescribed YCANTH consistent with the prescribing information. For all qualified patients, Verrica is responsible for all YCANTH product costs under the Program amount and excluding the copay requirement. Your insurance provider can provide the most accurate explanation of all charges. Approval to the Program is not guaranteed. Program has a maximum benefit (see ycanth.com/cost-savings for details). Until the patient reaches the maximum Program benefit, providing healthcare professionals may not charge the patient more than the applicable Program allowance. Patient will bear financial responsibility for all costs not covered by commercial insurance exceeding maximum benefit for YCANTH. THIS IS NOT INSURANCE. Not valid for prescriptions paid, in whole or in part, by Medicaid, Medicare, VA, DOD, TRICARE®, or other federal or state programs including any state pharmaceutical assistance programs. This Program is not valid where prohibited by law, taxed or restricted. Verrica reserves the right to rescind, revoke, terminate, or amend this offer, eligibility, and terms of use at any time without notice. Additional terms and conditions may apply.

TRICARE® is a registered trademark of the Department of Defense (DOD), DHA.
